Before you install the Product

- ✚ Please check if your computer meets the system requirements specified below.

Supported Operating Systems

- Windows 10
- Windows 8
- Windows 7
- Windows Vista
- Windows XP (32 Bit)

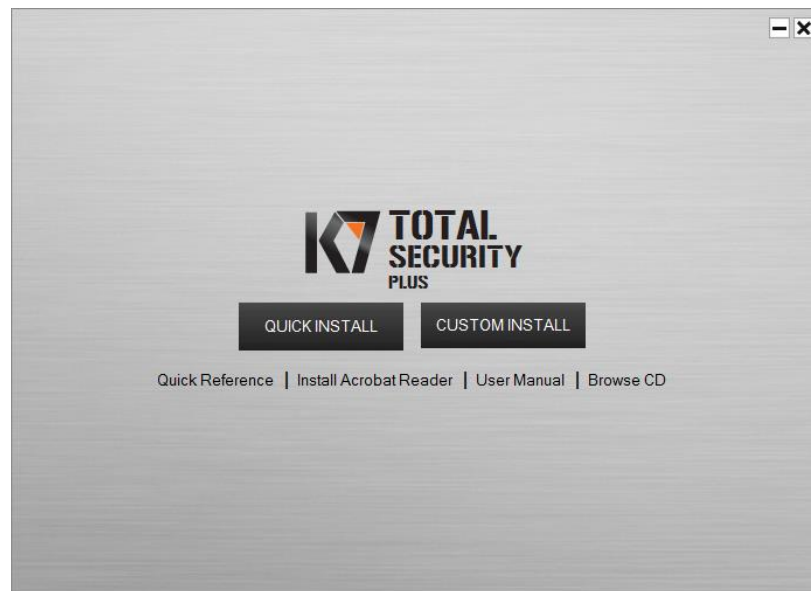

Windows 95, Windows 98 and Windows 2000 are NOT SUPPORTED.

Required for all installations

- CD/DVD drive for installation using CD
 - Internet Explorer 6 or higher version
 - Minimum 512MB RAM
 - Internet Connection for Activation & Updates
- ✚ Uninstall any other security product (firewall / antivirus program) through Start → Control Panel → Add/Remove Programs, if it is installed on your computer
 - ✚ Close all active applications and proceed with installation.

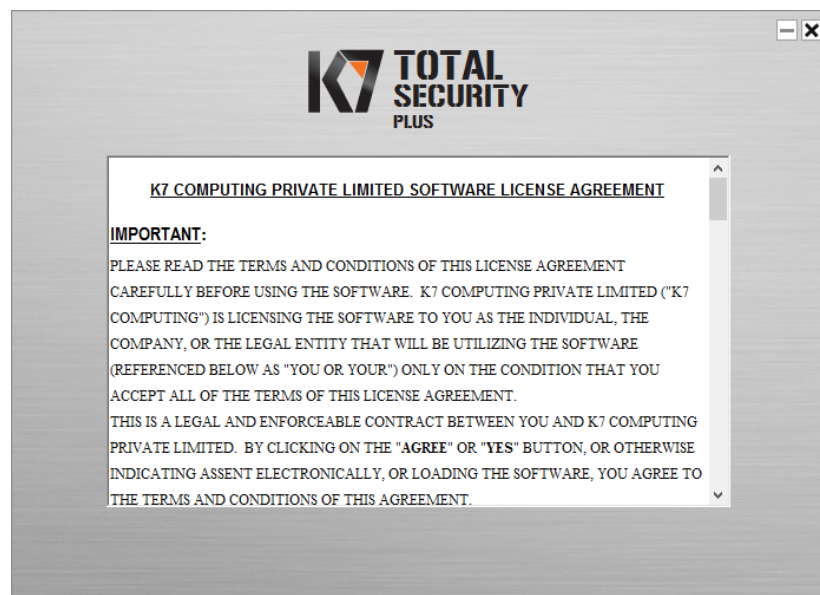

Installing the program

Insert the CD into the CD/DVD drive and allow opening the following CD Start window:

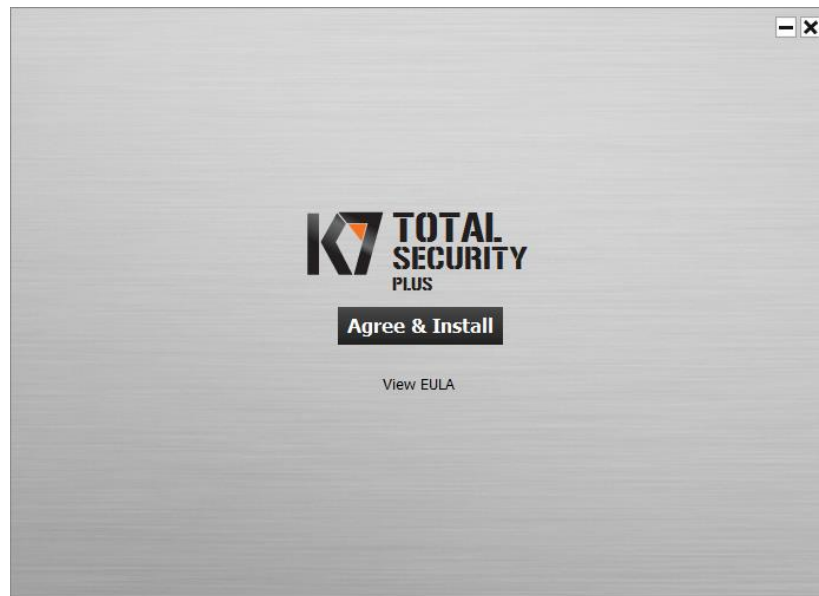

Quick Installation

Click on **QUICK INSTALL** to install the product quickly and you can view the 'End User License Agreement' by clicking **View EULA**

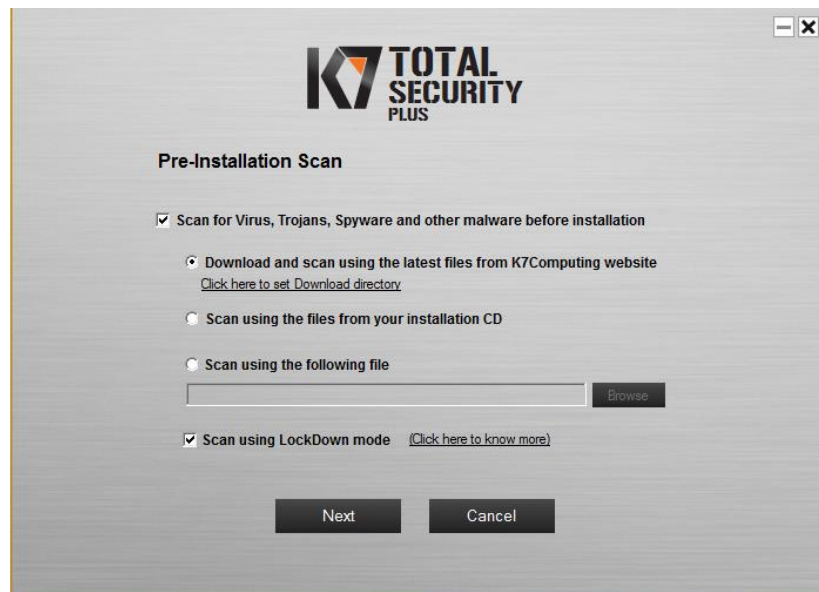

Once you read License Agreement close the window and then click **Agree & Install** to install the product on your computer.

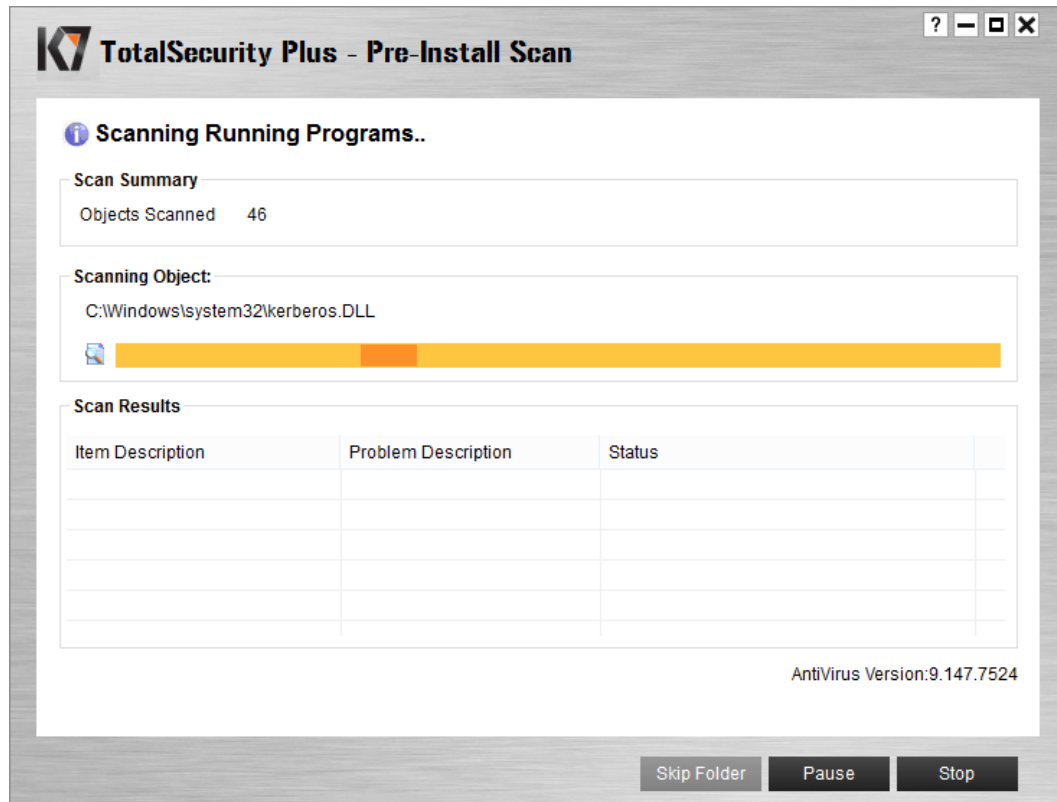

Custom Installation

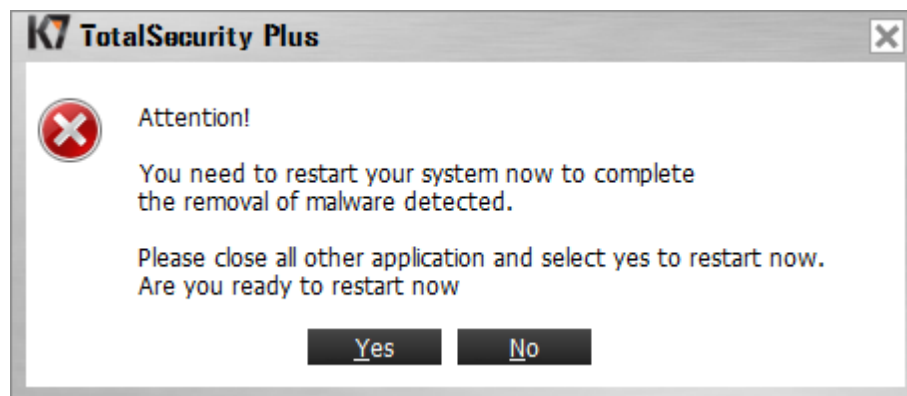

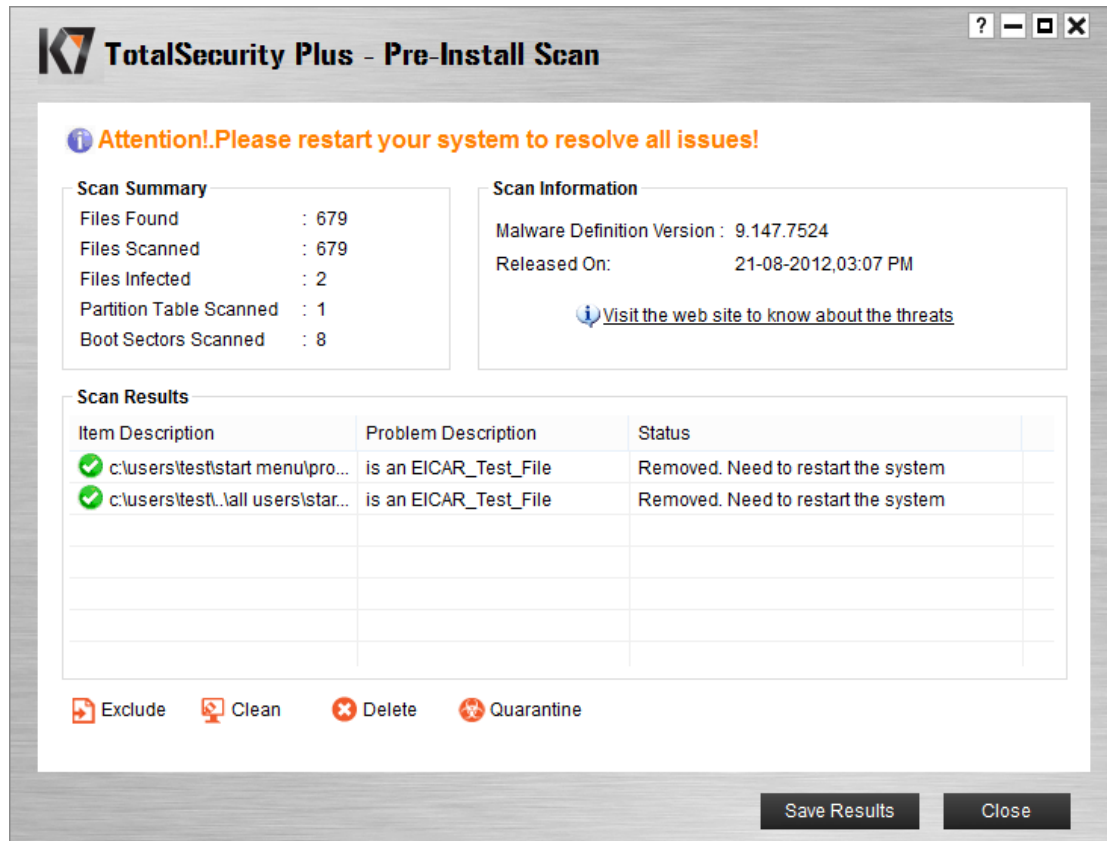

If you want to scan your computer before installing this product, you can select **CUSTOM INSTALL** to launch the Pre-Installation Scan dialog. The Pre-Install scanner detects and cleans malware in your system to ensure successful installation. Choose the option **Scan for Virus, Trojans, Spyware and other malware before Installation** and click **Next**.

Pre-Install scan window:

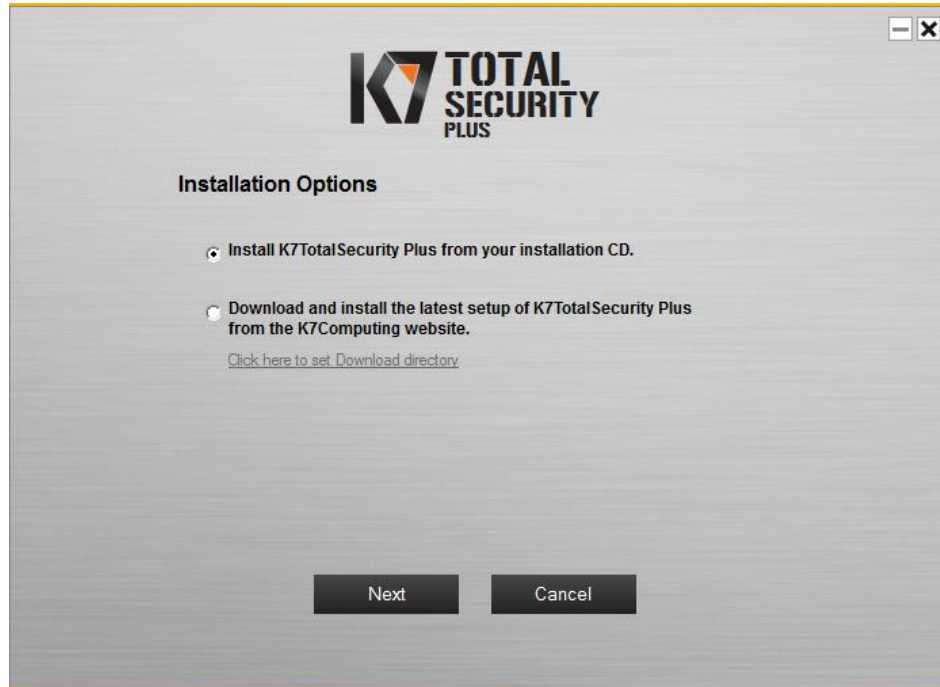

If the Pre-Install scan detects and removes malware, you will need to restart your system to complete the malware removal process.

Installation

If you have an active internet connection, you may download the latest setup from the K7Computing website or else you can install from the CD.

Click **Next** to proceed with the installation.

Activation

As soon as the installation is complete, you need to register and activate your product to receive regular virus definitions and product updates which will keep your system safe. Click **Activate** to start the activation process.

Note: Internet connection is required to complete the Activation.

Provide the name and a valid email address of the user and enter the product key given in the Installation Guide that is available with the product package. Click **Next**, after reviewing the entered details and follow the on-screen instructions. On successful activation, your registration details are displayed on the screen.

Note: Please ensure to remember this information. It will be required if you decide to uninstall the program and re-install on the same or on a different system.

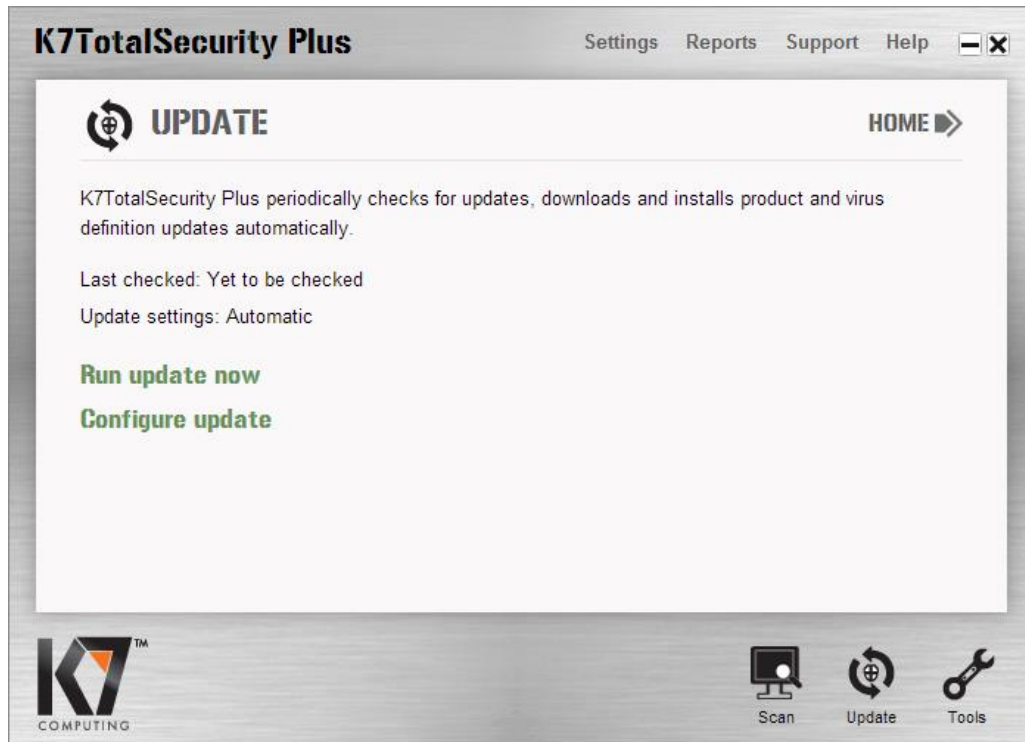

Main Console

The overall protection status of the computer is indicated by a green bar as **SECURE**.

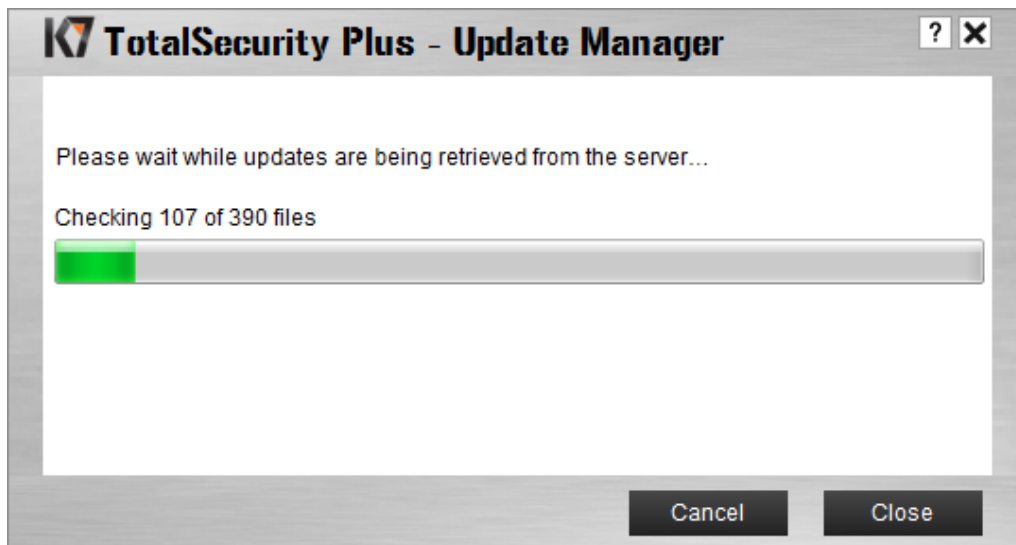

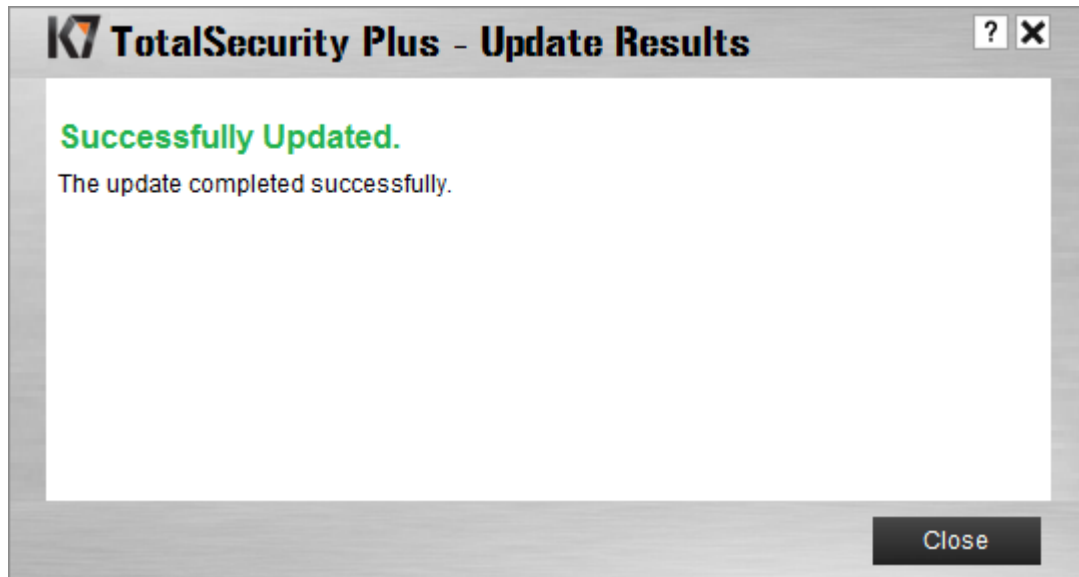

Updates

The product is updated automatically on regular intervals to receive the latest virus signature database and other product updates. To know the update status and view the update settings, click on the **Update** icon in the Main Console.

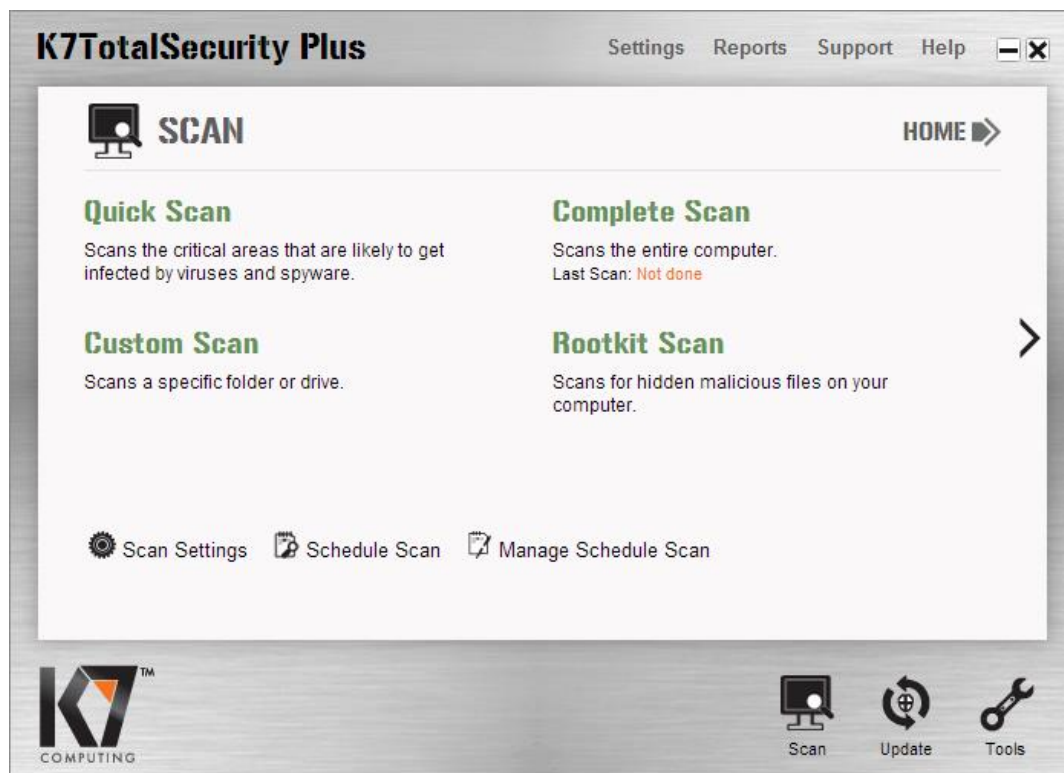

Click **Run update now** to check for newer updates.

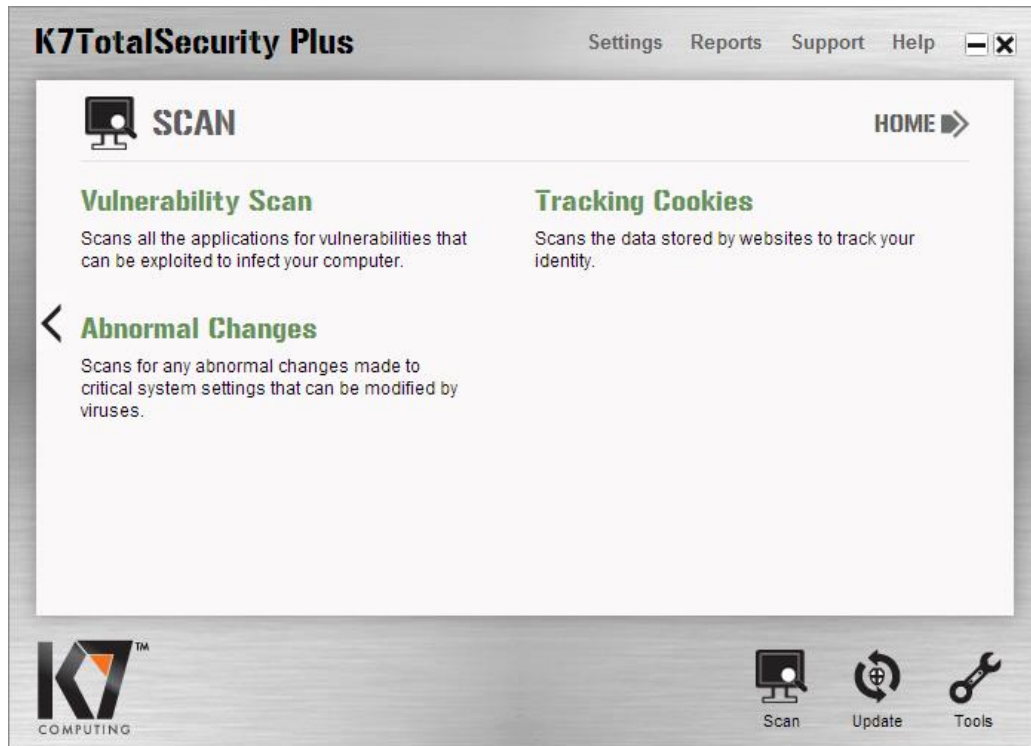

Scan Options

Click on the **Scan** icon on the Main Console and choose the option which you wish to run.

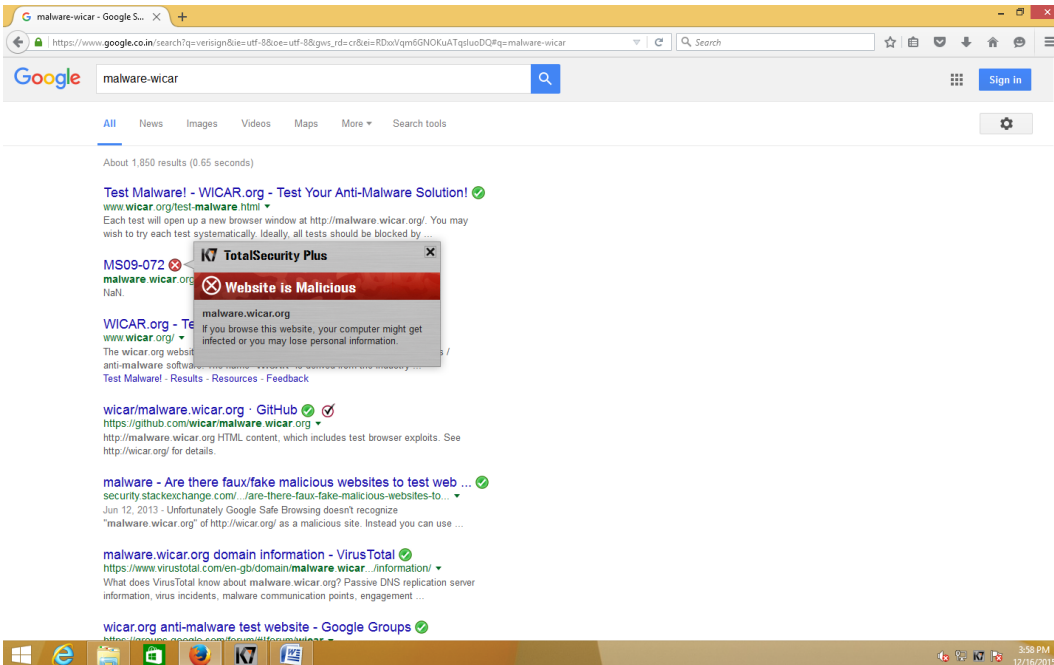

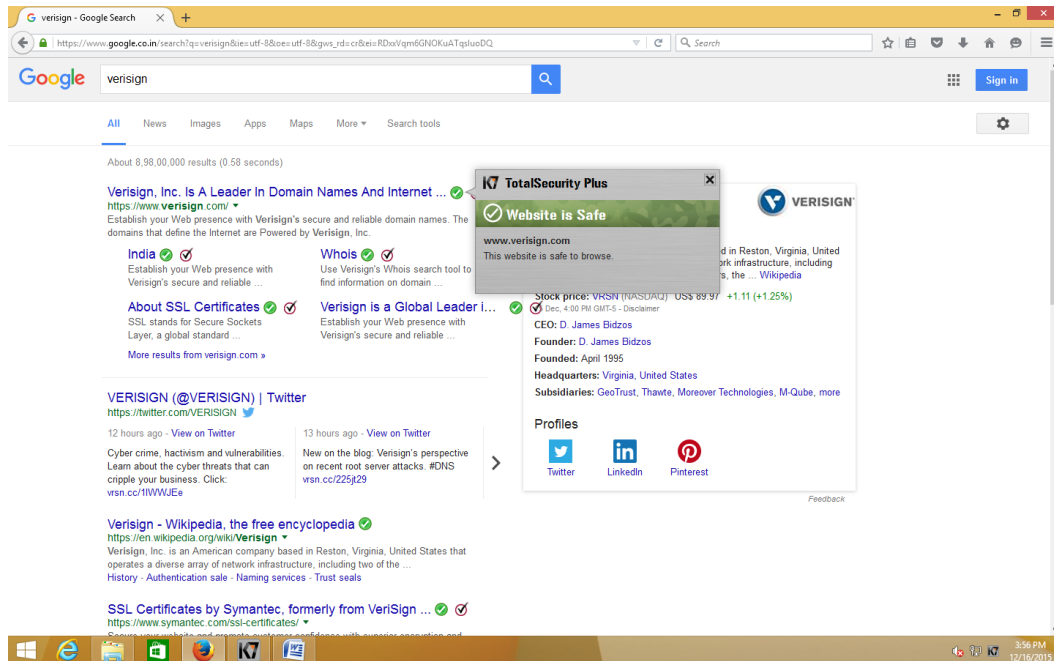

Click the right arrow to view more scan options.

Safe Search

You can perform a safe search and also check the safety of a web site that you want to visit on the internet. When you search anything using Google or Yahoo or Bing search engines, it shows the safety of the Web site. This feature is supported on Internet Explorer, Firefox and Chrome.

You can also view the VeriSign symbol if the web site is VeriSign trusted one.

Safe Surf

This will block automatically if you try to visit any phishing or malicious site URLs by mistaken.
